| 10:30 a.m. | Arrive at Stone Mountain
(Entry fee included; Students pay for lunch; est cost \$10) |

- *Stone Mountain is the largest exposed piece of granite in the world. It was created when shifts in the earth's crust created extreme heat and friction and melted a large amount of rock below the surface. This heated magma bubbled up towards earth's surface but did not make it all the way. Over time, the magma hardened into granite. Eventually, the land on top of the granite dome washed away through erosion and left what is now Stone Mountain.*
- *The top of the mountain is a surreal landscape some 800 feet above the surrounding land, and provides excellent views of the surrounding area and the skyline of downtown Atlanta.*
- *Stone Mountain Park surrounds the mountain, and encompasses a series of attractions.*
